موضوع: بخشنامه ۲۰۱۸-۰۲

PROVISIONAL CATEGORIZATION OF LIQUID SUBSTANCES IN ACCORDANCE WITH MARPOL ANNEX II AND THE IBC CODE

طبقه بندی بارهای مایع بر اساس مفاد و الزامات ضمیمه دوم کنوانسیون مارپل و آیین نامه حمل فله مواد شیمیایی

Number: 32/96/0087
Date: 03.01.2018

شماره: ۳۲/۹۶/۰۰۸۷
تاریخ: ۱۳۹۶/۱۰/۱۳

All respectful ICS' Customers / Surveyors
With gratitude

کلیه مشتریان و بازرسان محترم ICS

با سلام و احترام

Accordingly, IMO MEPC.2/Circ.23 which is in accordance with MARPOL Annex II and IBC CODE, and accordingly PMO circular, has been sent for your kind information.

بدینوسیله بخشنامه MEPC.2/Circ.23 آیمو در خصوص طبقه بندی بارهای مایع بر اساس مفاد و الزامات ضمیمه دوم کنوانسیون مارپل و آیین نامه حمل فله مواد شیمیایی، و همچنین پیوست بخشنامه سازمان بنادر و دریانوردی با موضوع فوق، جهت بهره برداری حضورتان ایفاد می گردد

معاون محترم فنی شرکت ملی نفتکش ایران

موضوع: بخشنامه آیمو در خصوص طبقه‌بندی بارهای مایع

با سلام و احترام

بدین وسیله به اطلاع می‌رساند بخشنامه MEPC.2/Circ.23 سازمان بین‌المللی دریانوردی (آیمو) در خصوص طبقه‌بندی پیشنهادی بارهای مایع بر اساس مفاد و الزامات ضمیمه دوم کنوانسیون مارپل و آیین‌نامه بین‌المللی حمل مواد فله شیمیایی (IBC Code) در تاریخ اول دسامبر 2017 منتشر شده است. طی این بخشنامه، که جایگزین بخشنامه‌های پیشین با همین عنوان می‌شود، بارهای مایع در پنج فهرست زیر قرار می‌گیرند:

1. محصولات خالص، یا نسبتاً خالص، یا مخلوط‌هایی که به عنوان یک محصول تلقی می‌شوند؛
2. مخلوط‌های آلاینده، حاوی حداقل 99 درصد (وزنی) از اجزاء ارزیابی شده توسط آیمو؛
3. مخلوط‌های (دارای نام تجاری) حاوی حداقل 99 درصد (وزنی) از اجزاء ارزیابی شده توسط آیمو به عنوان خطرناک برای ایمنی؛
4. مخلوط‌های آلاینده، متشکل از یک یا دو جزء، تشکیل دهنده بیش از 1 درصد (وزنی) آن مخلوط، که تا کنون توسط آیمو ارزیابی نشده‌اند؛ و
5. مواد حمل شده به صورت اجزاء مخلوط و نه خالص.

مراتب جهت بهره‌برداری کارشناسان ذیربط اعلام می‌گردد. شایان ذکر است فایل این بخشنامه در قسمت اعلامیه‌های دریایی، «بخش‌نامه‌های ایمنی و حفاظت دریایی - بخش‌نامه‌های محیط زیست» در سایت سازمان بنادر و دریانوردی به نشانی <http://www.pmo.ir> قابل دسترسی است.

MEPC.2/Circ.23
1 December 2017

**PROVISIONAL CATEGORIZATION OF LIQUID SUBSTANCES IN ACCORDANCE
WITH MARPOL ANNEX II AND THE IBC CODE**

1 Introduction

This circular is issued in accordance with regulation 6.3 of MARPOL Annex II, replacing all previously issued circulars under this title.

2 Lists of annexes

2.1 The circular includes the following annexes:

- Annex 1:** List 1: Pure or technically pure products and mixtures assessed as a whole
- Annex 2:** List 2: Pollutant only mixtures containing at least 99% by weight of components already assessed by IMO
- Annex 3:** List 3: (Trade-named) mixtures containing at least 99% by weight of components already assessed by IMO, presenting safety hazards
- Annex 4:** List 4: Pollutant only mixtures containing one or more components, forming more than 1% by weight of the mixture, which have not yet been assessed by IMO
- Annex 5:** List 5: Substances not shipped in pure form but as components in mixtures
- Annex 6:** Synonyms for vegetable oils
- Annex 7:** Country abbreviations
- Annex 8:** Tripartite agreement contact addresses
- Annex 9:** Manufacturers authorized to conduct pollutant-only assessments by calculation
- Annex 10:** Cargo tank cleaning additives
- Annex 11:** Biofuels recognized under the *2011 Guidelines for the carriage of blends of petroleum oil and bio-fuels*

2.2 Annexes 1 to 5 set out lists of Noxious Liquid Substances (NLS) (or products, as they are referred to hereinafter), by category, with associated carriage requirements, as assessed and confirmed by the ESPH Working Group of the PPR Sub-Committee, or as established under tripartite agreements and communicated to the Organization, in accordance with regulation 6.3 of MARPOL Annex II. Annexes 6 to 8 and 11 are intended to facilitate the reporting of tripartite agreements and the interpretation of abbreviations used in annexes 1 to 5.

3 Notes related to the annexes

Product lists (annexes 1 to 5)

3.1 The majority of products contained within this circular are trade-named substances. Since trade names are not translated, these products have been recorded exactly as communicated to the Organization and the lists are issued in English only.

3.2 The present circular incorporates the following amendments to the information set out in the previous circular (i.e. MEPC.2/Circ.22, MEPC.2/Circ.22/Corr.1, MEPC.2/Circ.22/Corr.2 and MEPC.2/Circ.22/Corr.3):

- .1 any new products, trade-named mixtures, and cleaning additives that have been assessed by the ESPH Working Group during the year;
- .2 amendments to existing product entries included in the product lists; and
- .3 new product entries covered by any new tripartite agreements communicated to the Organization since MEPC.2/Circ.22.

3.3 Any amendments made to the product lists (annexes 1 to 5) since the issue of MEPC.2/Circ.22 are identified by shading of the field in which a change has been made.

3.4 In certain cases, products may have been deleted from the product lists owing to the following reasons:

- .1 changes have been made to the product names (trade-named products);
- .2 withdrawal of products that are no longer manufactured or shipped (trade-named products); or
- .3 entries that were covered by tripartite agreements and have reached their expiry dates, but which have not been assessed during the period specified in the tripartite agreement.

3.5 Notwithstanding the above, if a tripartite agreement expires, or there is a change in carriage requirements for a product from the preceding to the new circular, while a shipment is in transit, then the carriage requirements at time of loading will apply.

3.6 Products marked with an asterisk (*) indicate that deviations from the normal assignment criteria, as set out in chapter 21 of the IBC Code, were used for the assignment of certain carriage requirements, based on expert judgement.

3.7 The definition of List 1 products, as contained in the present circular, corresponds to the definition of products contained in chapters 17 and 18 of the IBC Code. Products included in this list are either covered by a tripartite agreement, with an expiry date, i.e. have not yet

been assessed nor had their carriage requirements confirmed, or have had changes made to their carriage requirements subsequent to the latest set of amendments to the IBC Code. Such products will be duly incorporated into the IBC Code when next amended and consequently removed from List 1. The remaining product lists (annexes 2 to 5) do not correspond to lists contained within the IBC Code and entries contained in these lists will remain in the circular, subject to the provisions of paragraph 3.3 above.

3.8 Any footnotes to entries in List 1 (found in parentheses following the product entry) of this circular are defined at the end of chapter 17 of the IBC Code.

Country and territory codes (annex 7)

3.9 The list of country and territory abbreviations is that used in the Global Integrated Shipping Information System (GISIS), the system used by the Organization as the repository for all product information received and decisions taken regarding the assignment of hazard profiles (by the GESAMP/EHS Working Group) and carriage requirements (by the ESPH Working Group), for each product.

3.10 These codes are based on the standard UN/LOCODE system, a geographic code scheme developed and maintained by the United Nations Economic Commission for Europe (UNECE), a United Nations body. The codes are included in annex 7. Part 1 of annex 7 presents entries by code order, whilst part 2 gives a listing by country/territory order.

Cargo tank cleaning additives (annex 10)

3.11 MARPOL Annex II sets out limits for the discharge of NLS and includes restrictions on the types of cleaning additives that can be used in tank washing operations.

3.12 All cleaning additives set out in this circular (annex 10) have been evaluated by the ESPH Working Group, in accordance with the provisions set out in the *Revised tank cleaning additives guidance note and reporting form* (MEPC.1/Circ.590), and have been found to meet the requirements of regulation 13.5.2 of MARPOL Annex II.

3.13 Where products or their solutions appearing in chapter 17 or 18 of the IBC Code or in List 1 of this circular are used as washing media, their discharge shall be governed by regulation 13.5.1 of MARPOL Annex II. As such they are not required to be listed in annex 10 of this circular.

Bio-fuels used in bio-fuel/petroleum oil blends (annex 11)

3.14 Annex 11 sets out the list of approved bio-fuel/petroleum oil blends, as covered by the *2011 Guidelines for the carriage of blends of petroleum oil and bio-fuels* (MEPC.1/Circ.761/Rev.1).

4 Notification of new entries under tripartite agreements

4.1 The *Revised guidelines for the provisional assessment of liquid substances transported in bulk* are set out in MEPC.1/Circ.512. When notifying the Organization of any provisional assessment made under a tripartite agreement, Administrations are requested to:

- .1 specify the list in which the product entry should be entered; and
- .2 provide all relevant data to be included in the circular.

4.2 In addition, to further assist countries in determining the carriage requirements for products in bulk, a summary of "References to related information and recommendations for ascertaining the carriage requirements for products shipped in bulk" has been published on the IMO website and can be accessed at:

<http://www.imo.org/OurWork/Environment/PollutionPrevention/ChemicalPollution/Pages/TripartiteAgreements.aspx>

by following the link under "Related documents" in the right-hand column of the page.

4.3 As the majority of products communicated to the Organization are classified by the "calculation method" (see MEPC.1/Circ.512) and are candidates for inclusion in List 2, it is particularly important to provide the information to the Organization in a format that will facilitate efficient and accurate transfer to the database used to generate the various lists included in this circular.

4.4 For List 2 products, the preferred method is to send the information in the following format:

Reporting country:	
Manufacturer:	
Trade name:	
List number:	
Contains name:	
Pollution category (Cat):	
Ship type (ST):	
n.o.s. Number:	
Melting point (°C) (Mpt):	
Flash point (c.c., °C) (Fpt):	
Viscosity @ 20°C (mPa.s) (V ₂₀):	

4.5 For products to be included in List 1, 3 or 4, the format set out in appendix 3 of the annex to MEPC.1/Circ.512 is preferred.

4.6 The receipt of incomplete data for a product will result in the submission being delayed, while the application is returned to the originator for further review.

4.7 While stressing the importance of correct data being supplied to the Organization, it should be noted that, in particular, when proposing a product for List 2 or 4, the component with the greatest pollution potential should be specified following the word "Contains", in the Shipping Name. This is referred to as the "contains name". Such a component is that with the highest value obtained using the calculation method. In the event of there being more than one component with equivalent highest scores, discretion may be used in deciding whether one or both components should be identified in the "contains name". The name used for the component(s) should be that which appears in either chapters 17 or 18 of the IBC Code or in List 1 or 5 of this circular.

4.8 It should also be noted that any NLS offered for bulk shipment shall be indicated in the shipping document by the product name under which it is listed in chapter 17 or 18 of the IBC Code or the latest edition of this circular, or under which it has been provisionally assessed by tripartite agreement. In this respect, special attention should be given to BLG.1/Circ.17 regarding the use of the proper shipping name in offering bulk liquid cargoes for shipment and to BLG.1/Circ.25, which deals with the use of specific product names rather than generic entries, when both options are available to describe a bulk liquid cargo.

4.9 When shipping a pollution hazard only mixture (List 2 or List 4 substances), the appropriate n.o.s. entry in the IBC Code, together with the trade name and "product contains" information, would constitute the proper shipping name. For example, if the trade name is IMO 1234 and it contains "Calcium long-chain alkyl salicylate (C13+)" as the component with the greatest pollution potential, then the correct product name could be:

Noxious liquid, N.F., (5) n.o.s. (IMO 1234 contains Calcium long-chain alkyl salicylate (C13+)), ST 2, Cat Y

4.10 The Master of a type 2 ship certified to carry n.o.s. products would then know that he can accept the cargo without concern for fire, toxicity and other safety hazards and that, in the event of an accidental spill, he could report the name of the substance responsible for the pollution to the coastal State authorities.

4.11 When shipping (trade-named) mixtures, i.e. trade-named mixtures containing at least 99% by weight of components already assessed by IMO, presenting safety hazards (List 3 substances), the trade name and "product contains" information would form the proper shipping name. For example, if the trade name is XYZ 4567 and it contains "hydrochloric acid" as the component with the greatest pollution or safety potential, then the correct product name should be:

- XYZ 4567 (contains Hydrochloric acid); or
- XYZ 4567 contains Hydrochloric acid.

5 Tripartite contact addresses

5.1 In accordance with resolution MEPC.109(49) related to tripartite agreements, Administrations that have not informed the Organization of their latest contact details should be deemed to have accepted the tripartite agreements, whilst other contact points should still follow regulation 6.3 of MARPOL Annex II.

5.2 Administrations are therefore encouraged to verify their respective contact information, as included in annex 8 of this circular, and correct any errors or omissions.

5.3 In this respect, it should be noted that tripartite agreement contact points are available through GISIS (<https://gisis.imo.org>) and that any required amendments may be made directly in the database by the Administration concerned.

Tall oil acids reaction products with triethanolamine	4	NR	2	NI		Fp	2
Thioglycolic acid	0	R	2	NI		D	2
3-(Triethoxysilyl)propylamine	1	R	1	NI		D	2

* BLG 6 had agreed that, in the absence of measured chronic toxicity data, surrogate data using the GHS system to estimate missing chronic aquatic toxicity data could be used and that the estimation of chronic toxicity would be determined as shown below:

1. if, in the GESAMP Hazard Profile, Col B2 is 'NI' or Col A1 is 'NI' or Col A2 is 'NI', then there are not enough data to apply the OECD criteria, and therefore the product is deemed to be chronically toxic to aquatic organisms; but
2. if the aquatic LC50 is <100mg/l (Col B1 is 2, 3, 4, 5 or 6); and the product is Not Readily Biodegradable (Col A2 is 'NR') or the product is bio-accumulated (Col A1 is 4, 5 or 6), then the product is deemed to have a chronic toxicity of <1mg/l which is equivalent to a '1' in column B2; otherwise
3. the product is deemed not to be chronically toxic.

SYNONYMS FOR VEGETABLE OILS

CASTOR OIL

BP Castor Oil
 BSS Castor Oil
 Castor Oil First Special Grade
 Commercial Castor Oil
 First Pressure Castor Oil
 Fractionated Castor Oil
 Hydrogenated Castor Oil
 Interesterified Castor Oil
 No 1 Castor Oil
 Pharmaceutical Grade Castor Oil
 Ricinus Oil

COCOA BUTTER

Cocoa Butter Degummed
 Cocoa Butter Pressed Degummed Deodorized

ANNEX 11

BIO-FUELS RECOGNIZED UNDER THE 2011 GUIDELINES FOR THE CARRIAGE OF BLENDS OF PETROLEUM OIL AND BIO-FUELS

The following have been agreed as recognized bio-fuels in accordance with the 2011 *Guidelines for the carriage of blends of petroleum oil and bio-fuels* (MEPC.1/Circ.761/Rev.1):

- .1 Alkanes (C4-C12) linear, branched and cyclic*
- .2 Alkanes (C5-C7), linear and branched
- .3 Alkanes (C9-C24) linear, branched and cyclic with a flashpoint $\leq 60^{\circ}\text{C}$ *
- .4 Alkanes (C9-C24) linear, branched and cyclic with a flashpoint $> 60^{\circ}\text{C}$ *
- .5 Alkanes (C10-C17), linear and branched*
- .6 Alkanes (C10-C26), linear and branched with a flashpoint $> 60^{\circ}\text{C}$
- .7 Alkanes (C10-C26), linear and branched with a flashpoint $\leq 60^{\circ}\text{C}$
- .8 Ethyl alcohol
- .9 Fatty Acid Methyl Esters (FAME)[†]
- .10 Tert-Amyl ethyl ether*
- .11 Vegetable oils

* With regard to the shipment of blends of petroleum oil and any of these products under MARPOL Annex II controls, it is necessary to initiate or refer to tripartite agreements for such blends indicating the carriage requirements as appropriate.

[†] This entry is intended to include any specific FAMEs set out in chapter 17 of the IBC Code or the MEPC.2/Circular
